SEMINAR

Dear colleague,

the Water, Peace and Security consortium invites you to the seminar
“**Water and Security: assessing risks and mitigation options in hotspots**”.

This seminar provides an exciting opportunity to discuss how to predict water-related security challenges around the world and how to address them. The consortium promotes collaborative action by the diplomacy, development and defense communities.

You are invited to join this interactive session during the World Water Week to critically discuss this integrated approach to address water-related security risks and conflicts.

Monday, 27th of August ~ 16:00 - 17:30 ~ NL Auditorium

More information on the programme and speakers can be found via
<https://programme.worldwaterweek.org/Schedule>
